Building Management System (BMS)

Full coverage of building users

Effective integration

Integrated building, power, and occupancy management

Design, Build, Operate and Maintain

Low current total solution

One directional supply >> supply and demand integration

The future is here

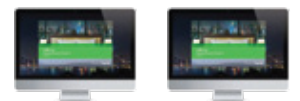

The Connected Room Solution uses special controllers and new magic sensors to transform the occupant experience by analyzing different environmental factors of a space and automatically adjusting things like temperature and light to deliver an optimized and comfortable setting for occupants

Energy automation

Site-by-site integrated company management

With an open and secure software integration framework, supervision software allows collaboration across complex remote systems to create truly innovative custom solutions.

Our advantage

Our mission is to be your effective partner for sustainability and efficiency. we drive digital transformation by integrating process and energy technologies, online connecting products, controls, software and services, across the entire lifecycle, enabling integrated management, for homes, buildings, hospitality, healthcare and other large variety of buildings. we are the most local of global technologies. you will have the best business experience with us by:

- **One team** for all low current needs: HVAC, lighting, access control, CCTV and etc.
- **Professional services** from the beginning of design, implementation and during the operation
- **Effective guarantee** will ensure the continuity of your construction services
- **After-sales service** up to ten years ensures that no customer left behind

Open, flexible, data-centric. Go beyond traditional building management system functionality to create smart, future-ready buildings with EcoStruxure Building Operation. Part of the EcoStruxure Building integrated smart building platform; this open, flexible, data-centric solution provides a single control center to monitor, manage and optimize all types of buildings.
